

BIBA PLAYGROUND GAMES

Add a **digital** layer of fun to your play space that uses the power of screens and **augmented reality** to get kids active!

Biba serves as a new digital solution that gets kids physically active and moving in play spaces while encouraging more parent / child interaction. But additionally, our games **also provide you with never-before-seen data** about how your users interact with your play structures!

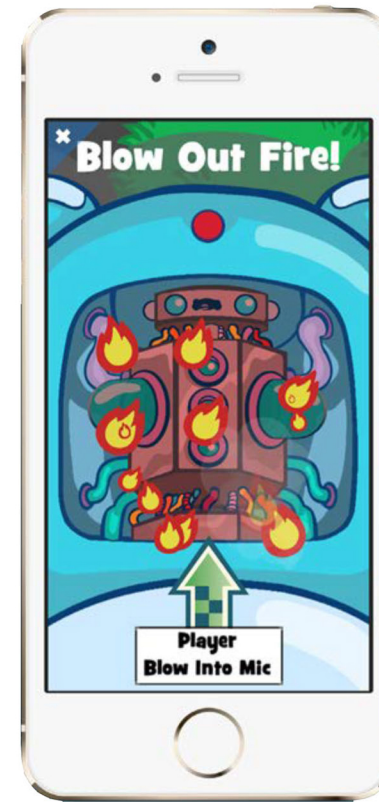

Upgrading your existing play space with a Biba Kit will unlock hidden potential in your play space!

BENEFITS OF A BIBA KIT

In purchasing a Biba Kit for your play space, you will unlock access to a **catalog of games** that can be refreshed and **updated in real time**, ensuring that families always have something new to play!

You will also get **real-time user data about your play space**. On a monthly basis, Biba will send you a report on your play space that allows you to gain a greater understanding of how families use your space with report metrics ranging from from peak days and hours to equipment preference!

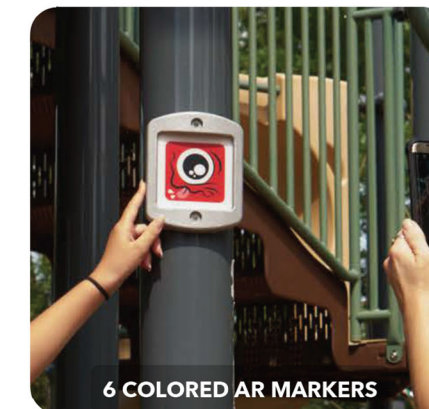

With Biba, you get **evergreen play content** while receiving **evergreen intelligence** about your play space. It's a win-win!

Biba games are played with the parent as the referee. This means the parent downloads the game and holds the phone through the **entire** game experience.
